

Overview

Effective investigations are a key activity of any Safety Assurance program. Safety occurrences and incidents when properly investigated and analysed have the potential to facilitate proactive safety improvements within an organisation. These learning opportunities may be used to prevent the occurrence of more serious incidents and accidents.

This safety investigators course has been especially designed for those involved with the investigation and analysis of safety occurrences including incidents and near misses. This includes management at all levels and safety assurance personnel. Participants will develop the practical skills needed to investigate and analyse operational incidents with a view to developing safety improvements within their organisation.

Why Choose Southpac?

Southpac has the reputation for conducting the most practical and up to date aviation auditor training and investigator courses in the industry.

Southpac have been involved with Quality and Safety Management Systems and their application within the aerospace industry for over twenty years.

We are at the forefront of safety innovation, and we are committed to equipping organisations with the knowledge, skills and tools to be able to create a culture that fosters and develops effective approaches.
